CONCRETE WASTE

If you have concrete that you wish to get rid of, please contact our office at (585) 617-6160 to arrange for disposal. If you have under 2 wheelbarrow loads full and it is broken up to sizes that can be lifted by our crew, you will be instructed to place it by the roadside (not in the roadway) and we will pick it up.

If you have over 2 wheelbarrow loads full, you will be required to rent a town roll-off overnight that will be parked in your driveway. You will load the concrete waste onto the roll-off yourself and we will pick the roll-off up the next morning. Roll-off rental is available for $40 and you can download the rental form from the highway home page. There is a link for the form on our website. If you need someone to come out and assess the pile to determine if we can pick it up or if a town roll-off must be rented, we can do that for you.
